

DATA SCIENTIST | MACHINE LEARNING & APPLIED AI SYSTEMS

Komolafe Fatai Abiodun

Lagos, Nigeria | Open to Remote, Hybrid & Relocation

+2349031724197 | fatai.abiodunkomolafe@gmail.com | [github](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Scientist with a Statistics background and hands-on experience building end-to-end machine learning and applied AI systems. Delivered deployed projects spanning predictive analytics, explainable ML, Retrieval-Augmented Generation, multi-provider LLM inference and evidence-aware decision support, with experience extending models into APIs, user-facing applications and production workflows.

TECHNICAL SKILLS

- **Data Science & Machine Learning:** Statistics, Exploratory Data Analysis, Feature Engineering, Predictive Modelling, Classification, Model Evaluation, Cross-Validation, SHAP, Scikit-learn, CatBoost, XGBoost
- **Applied AI:** Large Language Models, Retrieval-Augmented Generation, Intelligent Retrieval, Agent Workflows, Grounded Generation, Evidence Verification, Prompt Engineering
- **Engineering & Data:** Python, SQL, R, FastAPI, REST APIs, PostgreSQL, SQLite, ETL, Data Validation, Batch Processing, Docker, Testing
- **Applications & Deployment:** Streamlit, Next.js, React, TypeScript, Data Visualization, Git/GitHub, Render, Railway, Vercel

FEATURED SYSTEMS

Customer Retention Intelligence Platform | Machine Learning Decision Intelligence

Tech Stack: Python • CatBoost • FastAPI • Streamlit • SQLite • SHAP • Docker

[Live Product](#) | [Case Study](#) | [GitHub](#)

- Built and deployed an end-to-end retention intelligence platform using **7,000+ customer records**, transforming churn modelling into individual and batch decision-support workflows.
- Developed and evaluated predictive models, with the production classifier achieving **0.862 ROC-AUC, 0.596 F1-score and 80.4% holdout accuracy**.
- Engineered FastAPI inference services supporting batch scoring of up to **5,000 customers**, with SHAP explanations exposing customer-level drivers behind churn risk.
- Extended model outputs into prioritised retention intelligence, customer analytics and exportable **PDF, CSV and Excel** reporting to support practical downstream decision-making.

Enterprise Knowledge Intelligence Platform | Enterprise RAG & Grounded AI

Tech Stack: Python • FastAPI • Next.js • RAG • LLMs • Agent Workflows

[Live Product](#) | [Case Study](#) | [GitHub](#)

- Built and deployed an enterprise knowledge intelligence platform separating retrieval, evidence evaluation, reasoning, synthesis and verification rather than relying on a single RAG prompt pipeline.
- Implemented **3 specialised reasoning routes** for Enterprise Retrieval, Policy Intelligence and Hybrid Research, enabling purpose-specific processing for different knowledge tasks.
- Integrated **3 LLM providers** through a provider-abstraction layer, improving inference resilience through fallback behaviour and reducing dependence on a single model provider.
- Added evidence ranking, citation handling and a dedicated verification layer, exposing grounded outputs through Next.js workspaces for knowledge, policy, research and evaluation workflows.

PROFESSIONAL EXPERIENCE

Administrative Clerk

13 Brigade Nigerian Army, Akim Barracks, Calabar Aug 2023 – Jun 2024

- Maintained administrative records, official correspondence and operational documentation, supporting reliable information retrieval and day-to-day unit coordination.
- Prepared and updated records and reports requiring consistent attention to **accuracy, confidentiality and document control**.
- Took on additional coordination and leadership responsibilities during service and was recognised as **Best Corper of the Year** for performance and contribution.

Finance Intern

Delta Afrik Engineering Ltd, Lagos Jun 2021 – Dec 2021

- Supported transaction documentation, data entry and financial record verification, helping maintain accurate and organised records for routine reporting.
- Assisted with spreadsheet-based reconciliation and review of supporting financial documents to identify and resolve record inconsistencies.
- Organised financial information and documentation for easier retrieval and recurring operational finance activities.

EDUCATION

Bachelor of Science (B.Sc.) — Statistics

Federal University of Agriculture, Abeokuta 2017 – 2023

Certifications & Training

- **AI & Data Science Fellowship** — SAIL Innovation Lab, CcHUB | 2025
- **Data Analytics 1 & 2** — Robin Hunt, LinkedIn Learning | 2024
